

Construction Standards apply to any employee conducting construction, alteration, and/or repair, including painting and decorating. Depending upon their complexity, maintenance activities might also be covered by the construction standards. For MWA employees, please contact the MWA SHEM Office if there is a question whether these standards apply to a specific project.

It is ARS Policy to comply with OSHA regulations. Fortunately, OSHA has published numerous tools and guidance documents to assist Locations with this. For new projects, the MWA SHEM Office recommends following the steps in the Compliance Assistance Quick Start link below to identify the major OSHA construction requirements and guidance materials that may apply to your jobsite. For workers already familiar with this process, the Construction Industry Safety Topics will take you to an index of construction topics by OSHA standard to quickly locate those applicable to the project. Several of the most commonly used construction standards are also linked below.
